Gigantic Task Ahead . . .

Computer Process Starts As First Semester Ends

by David McMonigle
Universe Staff Writer

The semester will end Friday, and the work of the computer processing section will begin.

With the close of each semester, the gigantic task of computing grades, recording new registration fees and registering students for the new school term will begin in full.

THE PHENOMENAL GROWTH of electronic computers has greatly revolutionized the processing of scientific and business data all over the United States. Brigham Young University is no exception.

BYU has been using the famous, punched card and electro-mechanical equipment since 1952. Since that time the University has witnessed a two-fold student-body growth so, the need for faster equipment has also grown.

THE FIRST COMPUTING device at BYU was the IBM 650, a vacuum tube computer purchased in 1953. In 1952 the decision was made to study the present and future computer needs of the school. A faculty and administrative committee was organized to make recommendations on BYU's computer needs. They recommended a large scale computer for BYU.

The decision was made to lease an IBM 7040 system which is basically a high speed transistor computer with magnetic tape drives, a 600 line-a-minute printer, a card reader and card punch. This new system was installed in December 1963. An IBM 1401 computer system joined the 7040 in July 1964.

THE BIGGEST CHALLENGE for BYU and any other university is to use the computer with creativity and imagination in research work. According to Dr. Carlson, the director of the BYU Computer Center, "With the computer it will be possible to sift through man's knowledge and pinpoint where man is lacking."

BYU is approaching the organization of a computer operation somewhat differently than most other universities. Instead of having separate computers for research and administration with separate staffs, BYU has combined these areas into one center.

DR. CARLSON FEELS that this gives the university greater control over this electronic tool and also enables better utilization of the talent and experience available to operate such a department.

He admits, however, that this combined operation can cause machine scheduling problems. These problems are minimal under a flexible schedule.

Another fundamental difference of the BYU computer operation is that it is not directly under a financial controller as such operations are at many other universities and businesses.

SOME OF THE ADMINISTRATIVE applications for the BYU computer are: financial reports, student registration, grade reporting, and alumni data. Some of these are partially applied to the 7040 computer operation now. The ultimate goal is as Dr. Carlson says, "... to give the administration an overall view where we are now."

He also pointed out that the computer will eventually enable the university to analyze a student continually rather than periodically. When asked how the computer would eventually affect the personnel needs of the university, Dr. Carlson felt that the computer would increase the need for administrative decisions because of the immediate access to information. This would do away with tedious clerical tasks. In other words, the machines would do so much that we would want more people to do it with.

PROFESSING ON THE FUTURE of electronic computers at BYU and universities in general, Dr. Carlson foresaw the time when the cost of computing devices would decrease. The present costs are too prohibitive for widespread use in any one organization. Dr. Carlson also predicted the gradual demise of the seemingly invincible punched card. With the advent of optical scanners and magnetic ink, it will be possible to communicate with the electronic computer by more direct methods.

Where is the computer taking us? Dr. Carlson believes the computer is the first conceptual step since the wheel. Where has the wheel taken us?

Scholarship In Law Available

A candidate for the Root-Tilden, Snow scholarship in law must hold, prior to commencement of his law school training, a baccalaureate degree which is approved as a basis for law study by the New York State Education Dept., according to Wesley P. Lloyd, Dean of the BYU Graduate school.

IF THE CANDIDATES degree is not so approved, says Lloyd, he will be required to obtain a Law Student's Qualifying Certificate from the Education Dept.

Other qualifications for the scholarship are:

A candidate must rank academically in the upper quarter of his college class, and must exhibit qualities of leadership and character that will enable him to become an honorable and effective member of the legal profession.

A CANDIDATE MUST, at the time his law school training is to commence, be a male citizen of the U.S. between the ages of 20 and 28. He must not previously have attended any law school. He must be unmarried and may not marry during the first or second year of law school and retain his Root-Tilden scholarship.

The Root-Tilden stipend is valued at \$2,780 a year and provides, in addition to tuition, a sum of \$1500 for living expenses. The Root-Tilden scholar is also reimbursed for not more than the jet air coach rate for his actual expenses of travel to New York in the fall and to his home at the end of the academic year.

APPLICATION DEADLINE for this scholarship is early Feb. 65. Applications are now being received.

For any additional information please contact Dr. Stewart L. Groom, 357 McKay, Ext. 2241 or Katherine V. Welch, Graduate Awards Office, D-227, Smoot Bldg., Ext. 2019.

Student Visits Boeing

Vernon C. Poulter, an electrical engineering major from Brigham City, recently returned from the Fourth Annual Boeing Advanced Technology Forum in Seattle.

He was selected to represent BYU by department chairman and faculty committees. The students visited laboratories and discussed the application of their educational field in the aerospace industry.

Campus and Controversy

Don't Miss It

Last night we had the fortunate opportunity to attend a presentation of "Lamp At Midnight," which is the play now being given by the Drama Dept.

We're ashamed to admit, that this is the first we've attended since I've been a student here (three years). So this is directed to those of you, who like us, have not gone to these productions in the past.

First of all: we're never missing another one again as long as we're here. And second: this production is fantastic.

The acting was flawless and convincing. The actors truly felt and lived their parts, which kept us just captivated throughout.

The costumes were authentic; many were so richly done as to leave one speechless.

The Drama Theatre is beautiful, with excellent facilities, and in the staging of this play, these were used very effectively; revolving set, acoustics, sound system, lighting. The Drama Dept. should be congratulated for this masterpiece.

And to those of you, who like us, have never found the "time" to go to these productions—GO.

One should never feel that this would not appeal to them for it will.

Christopherson

Article Reaction

When I read articles like the one by Stan Hodge in the Daily Universe of Thursday, January 7, I truly become concerned.

My immediate concern, of course, is for the lack of intelligence displayed in the editorial reaction of some of the supposed leaders on this campus to the recent article in Sports Illustrated. My deeper concern is for the dissenter that has befallen journalism when the author cannot vary from the scientific listing of the strict facts to add to the favor of his subject.

Coach Watts has said several times that he was vastly misquoted and misrepresented, but nowhere has he taken the trouble

to say how this was done about what I sometimes say if his is a call of "two sides."

While I, like many others, chuckle to myself as I read magazine article, I find the all impression desirable, as well as a period of time of being belonging to a group that is making itself great.

I fail to see where or how crimes that Mr. Ottum is about to be hanged for committing. I must admit my attitude of appreciation my mother taught me a very complacent: "Thank You."

JoAnne M. Lenz

Making Films Part of New Curriculum

Individual projects in short motion picture films are a feature of a new communication Picture Production offered in spring semester by the Department of Communication at BYU.

THE NEW OFFERING, communications 372, will be taught by the Harris Fine Arts Center, Irwin Goodman, production director of the BYU Motion Picture Studio. He holds degrees in production from University of California at Los Angeles communications from University of Indiana.

Production aspects to be included in lecture and laboratory sessions include script writing, board preparation, camera operation, and film editing. Students will plan and direct short silent films during semester, and will also produce "news" for the of his classmates.

"THIS COURSE is designed to serve those who will use in television news, documentary or advertising applications, according to Dr. Oliver R. department chairman. It is planned to aid teachers who to develop film material in classroom instruction, and guide amateurs seeking to produce more interesting movies."

A basic course in photography is required as a prerequisite for the new course.

IL.A Strike Threatens More Unions; Organized Labor Backs Peace-Pact

NEW YORK, (AP)—A strike of 60,000 East and Gulf coast longshoremen threatened Tuesday to spread to other waterfront unions, even as organized labor backed a once-proposed peace pact as a means of halting the costly walkout.

THE FEDERAL government hinted, meanwhile, that a long and costly tiep could bring compulsory arbitration to the shipping industry. The United States canceled a scheduled Thursday sailing to Europe of its flag ship, the United States, stranding 800 passengers in New York. The move was prompted, the announcement said, by indications that union crewmen aboard the vessel would refuse to cross picket lines of the striking AFL-CIO International Longshoremen's Association.

The United States became the first of the big luxury liners to be marooned in a two-day strike that has tied up some 200 ships from Mexico to Texas. The cost of the longshoremen's strike to the nation's economy was estimated at more than \$30 million a day.

LATER, the Moore-McCormack line cancelled Wednesday's sailing of the liner Argentina on an eight-day Caribbean cruise. A spokesman said the strike prevented provisions from being put aboard.

The longshore union has ordered a new vote on a proposed dock contract, which New York longshoremen rejected last Friday by about 900 votes. No date for the reballoting was set. The proposed pact had been expected to set a pattern for local agreements in 40 other East and Gulf coast ports.

Fear of loss of jobs through automation apparently lay behind last week's repudiation of the contract. Union President Thomas Gleason summoned delegates from all locals along the 520 miles of New York piers to "set the record straight."

They were expected to return to their rank-and-file with the assurance from Gleason that "no

man will lose his employment."

JOINING Gleason in the sell-off job were public relations chiefs from the parent AFL-CIO and two other waterfront unions, the National Maritime Union and the Seafarers International Union.

Federal pressure to halt the strike also was evident, although President Johnson withdrew any direct intervention, except by means of the Labor Department.

Asst. Labor Secretary James J. Bevinck, close to the longshoremen's deadlock for many weeks, was understood to have raised the specter of compulsory arbitration if the dock tiep persisted. He is said to have reported

some Congressional sentiment for such legislation.

In its second day, the strike had not yet affected the general public to any wide extent. However, the longer it continued, the more reluctantly its economic tidal wave was expected to roll inland. A 34-day walkout in 1962-63 cost the nation's economy an estimated \$1 billion.

THE PROPOSED

sprung last week by New York dockers, was called by ILA leaders "the best contract in the 72-year history of the union."

In turning it down, New York longshoremen were believed motivated by fear of its automation provisions.

Nuclear Engine Exploded . . .

Blast Rocks Desert

JACKASS FLATS, NEV., (AP)—

A great cloud of dust and a fireball bright as the sun blossomed briefly on the desert Tuesday as scientists deliberately exploded a nuclear rocket engine to see what might happen in a launching accident.

DR. KRITH BOYER, directing the test for the Los Alamos Scientific Laboratory, said a first look at radiation monitors indicated humans would have been completely safe a mile and a half away.

The spectacular blast came at 10:55 A.M. as scientists ran a K-25 reactor up to full power, releasing in a split second a burst of energy millions of times the capacity of nearby Hoover Dam.

The 12-foot-high trash can shaped reactor burst into tiny fragments in a flash of heat and light estimated at 2,000 to 3,000 degrees Fahrenheit, roughly the temperature of the surface of the Sun.

TWINKLING BITS of radioactive debris shot several hundred feet in the air in a multi-colored shower above a huge dust cloud. Telephone poles 50 feet

away were blown into the air and set afire.

A white cloud of intense radiation rose from this and was blown harmlessly to the southwest.

An Atomic Energy Commission spokesman said the highest radiation in a populated area outside the test grounds was at a Little Rock Wells, 11 miles from the blast.

Earthquake Kills 4 On Canadian Road

HOPE, B.C., (AP)—British Columbia highways Minister P. A. Gagliardi figures an earthquake caused a gigantic slide that thundered onto a mountain road and killed four persons near here Saturday.

"IT LOOKED LIKE some giant stood on top of the mountain and split it with an axe like you would split a block of wood," Gagliardi said after a helicopter tour of the debris-filled 110 miles East of Vancouver Monday.

"There is absolutely no reason, other than a quake, for a slide to take place in this area," he said.

Heritage Hall Coeds Discover Using Garlic Powder An Art

Spicing the "kitchen-life" at Heritage Halls lately has been the trend toward a brand new image for spices.

WITH TOOTHBRUSH clutched tightly in their little fists the girls of 203 Kimball Hall have learned the art of using garlic. Credit for the zooming popularity of garlic should surely go to the dehydrated garlic products which were put on the spice shelf some two decades ago. Today we take a peek from instant garlic powder, garlic salt and instant minced garlic.

This spice is ever-ready and easy to use. It is of uniform strength when the exact amount of garlic are called for, as in these world-wide recipes from the kitchen of Linda Fales, from Powell, Wyoming.

INSTANT GARLIC POWDER or garlic salt can be stirred into a soup, sauce or stew at the last minute to adjust the seasoning, if necessary. Instant garlic is full-strength, while garlic salt is powder mixed with ordinary table salt. Instant mixed garlic is intended for use in products which require cooking, but this form can also be used to give aroma to salad dressings and vegetable cocktails if it is allowed to remain in the cold liquid for at least an hour.

SHISH KOFTESI

(Lamb on a Skewer)

1 lb. ground lean lamb
1 teaspoon salt
1/16 teaspoon instant garlic powder
1 teaspoon ground black pepper
1 teaspoon instant minced onion
2 tablespoons dry bread crumbs
1 large egg, beaten lightly
2 tablespoons olive oil salad oil
Frankfurter buns

Combine lamb, salt, instant garlic powder, ground black pepper, instant minced onion, bread crumbs, egg and oil. Shape meat into 1-inch balls. Brush well with additional olive oil and thread on skewers. Cook over a slow-burning charcoal fire. Serve in warm frankfurter buns or long French rolls.

YIELD: 6 servings, 5 balls per serving.

SKILLET MUSHROOMS, ITALIAN STYLE

2 tablespoons olive oil
6 anchovies, dried
1 pound fresh mushrooms, sliced

1/3 cup tomato sauce
1 teaspoon salt
1 teaspoon mint flakes
1 teaspoon ground black pepper

1/8 teaspoon instant garlic powder

4 slices toast, buttered
Heat oil in a 9-inch skillet. Add anchovies, mushrooms, tomato sauce, salt, mint, flakes, black pepper and instant garlic powder. Mix well. Cover and cook over moderate heat 10 to 12 minutes, stirring frequently. Serve on buttered toast.
Yield: 4 servings.

LINDA'S ROOMMATES, Mary Jane Black, Joan Layton, Paula Reedy, Berta Lewis and Shari Lightfoot, all fans of the well seasoned foods, find garlic a welcome addition to usually bland rice dishes.

Foods from the Mediterranean countries have especially been influenced by the use of warm spices.

MBA Wives Set Study Of Problem

The MBA Wives, acting committee for the Associated Graduate Students, is sponsoring a meeting of all wives of student athletes this Thursday.

THE WOMEN will meet Multi-purpose Area of the Family Living Center at 4 when the MBA Wives will present a short skit illustrating problems of the wife of the student. Wesley P., Dean of the Graduate School, spoke.

This meeting represents culmination of several months' considerations and planning a great deal of effort on the part of the MBA Wives and their faculty advisor, Mrs. Clinton, according to Jackson Patton, President of the Associated Graduate Students.

STUDENTS' WIVES have the opportunity to become acquainted with others in similar circumstances, to trade ideas, especially to become familiar with the fields their husbands are studying.

All wives of graduate students are invited to attend.

Focus on Sports

Dean Among Coaches

by Stan Hodge, Sports Editor

Art Griffith, the dean of college wrestling coaches, has the right idea for all sports when he says the major goal in coaching ought to be to make gentlemen of the wrestlers.

"Most people think of a wrestler as an uncouth hulk of muscle," he said. "Our boys were up and shaved, dressed (shirt and tie) at an early hour. They knew they didn't leave their spout in the ring. Nothing is more important. We taught them etiquette and made them gentlemen. And don't think that discipline didn't carry over onto the mat. It certainly did."

Mr. Hodge

A Perennial Champion

Mr. Griffith has been on campus visiting a former student of his, BYU wrestling coach Fred Davis. Davis finished with Coach Griffith's last team of matmen at Oklahoma State University in 1956.

What a wreath of laurels this man has made for himself. As wrestling coach at Oklahoma State he won eight national championships and coached at least one individual champion every year since he began—a total of 29 in all. He never finished below fourth, quite an accomplishment. No other coach can begin to match him.

Before that in high school he had 12 straight state titles at Tulsa. What made his teams so successful. He sums it up in one word: "Variety."

Wrestling's Like A Bullfight

"It's just like a bullfight," he explains, "most wrestlers are muscle men—bullies. At a bullfight, the matador doesn't try to take the bull by the horns... instead he creates diversions and dodges until he catches the bull unprepared. The key to the whole thing is mobility. If you can't move you're finished."

Just to illustrate his point he used the example of the Utah State matches Saturday. "Every school in the country except those whose coaches came from my program teaches a give and take type of grappling. They charge at the legs all the time. Take that away and 90 per cent of their offense is gone. Utah State tried 51 charges at BYU's legs Saturday—one was successful, not much of a percentage is it?"

Inspired by Necessity

It isn't much wonder that Coach Griffith came up with this highly successful approach. "At Tulsa High our students graduated when they were 16. Our competitors were often 21. How could our 16 year olds compete with men who had just voted? The idea came to me when I was fishing. I realized that it wasn't necessary for the man to stand and take the bull's charge head on—it'd be much better to just wave a flag at him."

Just how successful his methods are is seen easily by the fact that the national championship has only been out of Oklahoma four times since he took over at OSU. Since that time the crown has nearly always rested at Oklahoma State or the University of Oklahoma who benefited from his high school coaching.

What does the dean think about BYU? "Fred Davis is the finest man I've ever coached," he says. "He was as shifty as I've come. He won two national crowns. He won his first in his junior year and came back to do it again the next year but took the most awful cheating I've ever seen. He won't tell you so, but believe me, I know. I still say he won it twice."

"He and BYU have the makings of a wrestling dynasty right here in Utah. Three or four of the boys have good moves."

Tuesday he explained the elements of success to the team... "First there's strength; second speed; and third condition. Let's compare BYU with Oklahoma State. First, they're no stronger than we; second, we're just as fast; and third, no one's in any better shape. What's the difference? Let's add style. Move that to BYU's side of the board and they won't be beaten."

Is it any wonder this man was chosen to the Wrestling Hall of Fame?

Cougar Safari Ventures Into Dese Can They Withstand High Pressur

Brigham Young's rapid-fire cage quintet speeds onto the Western Athletic Conference range this weekend when the Cougars open league play against Arizona.

AFTER A FRIDAY night encounter at Tucson, the Cats will swing north to Tempe to meet Arizona State's Sun Devils.

The Cougars will be trying to erase some unpleasant memories this year in Arizona as last season's road trip south proved disastrous. The Sun Devils, paced by Joe Caldwell, swamped the Cougars 110-85 while the Wildcats hung a 80-67 loss on the visiting Drags.

TWO MEMBERS of BYU's 12-man contingent are still sidelined with injuries. Jeff Congdon is still out with a broken hand while soph Gary Hill is favoring a knee injury suffered in the Seattle game.

Even without this pair of stellar performers, however, the Cougars proved they can win on the visiting Drags. They defeated Utah State at Logan, 99-90 for Coach Stan Watts' first victory over the Aggies there in four long years.

Pumas, Lobos Fare Well On National Polls

Illinois, unranked in the top ten, continued to hold the key to major transitions in the Associated Press and United Press International college cage polls as Michigan rushed to second place again behind the powerful UCLA Bruins.

MICHIGAN DOWNED Illinois, twelfth ranked in UPI, 89-83, Saturday after the Illinois had blasted previously second ranked Indiana, 99-81, last Monday. Indiana fell to fifth after their loss against ten victories.

Brigham Young University, riding on the strength of two impressive victories against Seattle and Utah State, advanced from twelfth to sixteenth during the week in UPI.

UTAH DROPPED completely out of the ratings with its loss to Utah State. New Mexico of the Western Athletic Conference baged thirteenth in this week's poll. UCLA, beaten by the same Illinois spoilers, extended its winning streak to 11 last week with strong victories over Oregon and Oregon State.

Following are the top twenty cage squads in order as selected by UPI this week:

1. UCLA
2. Michigan
3. Wichita
4. Indiana
5. St. Josephs
6. Providence
7. San Francisco
8. St. John's
9. Davidson
10. Vanderbilt
- Second 10: 11. Duke; 12. Illinois; 13. New Mexico; 14. Kansas; 15. Minnesota; 16. Brigham Young; 17. St. Louis; 18. Kentucky; 19. Miami (Ohio); 20. Tennessee.

LEADING THE shock troops into Tucson will be 6-8 Center John Fairchild. The leanly pivoting man potted 22 counters and snagged 15 rebounds in the contest at Logan.

Steve Kramer, junior forward man, who played his best game to date against the Farmers, netting 20 points, and collecting 12 rebounds, should start against the Wildcats. This was not as easy as it seems since Kramer had the unenviable task of guarding All-American Wayne Estes. While Estes did get 34 points (not unusual for the Aggie star), he could not seem to stop Kramer from laying in soft hooks.

JOINING KRAMER on the forward line, if Watts goes with the same five as he did against Utah State, will be sophomore Neil Roberts. Roberts is a dead-end from the outside and will tough to stop although Arizona emphasizes the defensive side of the game.

Dick Nemelek and Mike Gardner are now labeled for the starting guard assignments. With this pair of hotshots in the backcourt, Watts can relax a little bit. Gardner dribbled circles around the Aggies while Nemelek popped away for 25 big points.

In case one of the starting five should falter, the Cougars again have the upper hand. Forwards Bob Quimby and Jon Stanley are ready to add height and experience to the Puma quintet. Skyscraper center, Craig Raymond, is there to spell Fairchild while Jim James and Ken James

appear ready for a reserve berth.

The Cougars plan to leave so Thursday afternoon and stay at the Desert Inn in Phoenix and the Koni Tiki in Phoenix.

Y Skiers Ranked Fifth

by Bob Snow
Universe Sportswriter

The BYU skiers travel to Snow Basin this week to defend their United Press International rating.

THE MEET, sponsored by Weber State College, will feature a downhill on Friday and a slalom on Saturday, with Montana State College, Utah State University, University of Utah, Idaho State and BYU attending.

The United Press International listed the top ten teams of skiing in the Nation before Christmas, and the Y Skiers sporting outstanding victories over Idaho State University, Rick College and the University of Utah was polled as fifth. Other schools listed in the top ten in the nation are as follows:

1. Denver
2. Colorado
3. Western States
4. Utah
5. Brigham Young
6. Middlebury
7. Dartmouth
8. Wyoming
9. Washington
10. Montana State

THE BYU SKI TEAM competing in the Rocky Mountain Intercollegiate Ski Association races six of the top ten ski teams

in the nation and always has their work cut out for them. At the upcoming meet the competition will not be easy as Montana, and Utah State also have fine alpine ski teams.

The ski team is accomplishing this on the smallest budget of any school competing in skiing, and on only extramural standing. What will they do when and if

of the Week ... ter Fairchild s For Pumas

y Roger McVean
Universe Sportswriter
makes a Player of the

DOES THIS honor is a player who isn't a star an cog in the wheel, but an who does the most to team. But this week a an has chosen who is later.

last week in the games Seattle and USU, John was a standout in scoring rebounding. In two week he scored 45 points and 32 rebounds, per admirably against larger opponents.

has quite an illustrious background in basketball, and has been a star all along. He attended high school in San Diego, where he led San Diego to High CIF Championship, and he received All-CIF in the process.

ated College at Pepperdine the next year transferred to Palomar Junior College, Palomar to the State ment and received All stars as a sophomore.

YEAH WAS his first the Y, and while making for the school, he did for himself. He was an All WAC first team and received All-American honorable Mention. He set and rebounding records.

When asked why he the Y, he replied "I was at first by the campus, coaching staff. They a hard schedule here was so friendly and help."

John was the high story written by a magazine. When asked he replied that, "It was title for the school, but at too factual, and sort edging. They created too controversy."

ULD LIKE to play pro was selected in the draft, is still along way off." with some prodding.

Peace Worker To Speak

The Young Democrats will meet Wednesday night at 7 p.m., in 278 Jesse Knight Building. The meeting will honor Lyman Smart, who has been advisor to the club for several years.

FEATURED SPEAKER will be Mary Kinsella, from Moorhead, Minn., a Peace Corps member in the Philippines for two years until December 1964.

Miss Kinsella also served four years as a member of the staff of Senator McCarthy (D-Minn.).

She will speak on "An Opportunity to Serve," concerning her experiences in the Philippines.

THERE WILL BE a short question and answer period following the speech. All interested in the Peace Corps are invited to attend.

Health Center Gets Phones For Patients

Installation of new telephone jacks in all the patient wards at the McDonald Student Health Center have now been completed, according to Dr. Cloyd Hofheins.

THE NEW SYSTEM will enable bedridden patients to hand-call the clinic directly to their bishops, families and friends on campus. The confined patients and members of the health center staff are extremely happy with the new facility, declares Dr. Hofheins, and publicly wish to thank the members of the Arizona Club who contributed the money to make the improved service possible.

Students who ordered color photos of the Court Student Union at the Y Center Information desk before Christmas may pick those pictures up on Friday and Saturday, 8 a.m. to 5 p.m. Students must show their activity cards.

80% Drop Out . . . Not All Continue School

Out of each freshman class, 300-400 choose pre-medical or pre-dental as their major. By graduation time, only 20 per cent continue on to medical or dental schools.

THE NUMBERS of students registering in these majors is indicative of the times, according to Dr. Lester Allen, advisor for the dental, health and dental professions, are the main reasons for the increase in medical and dental school applications.

BYU has a high rate of acceptance into these schools. Over 80 per cent of BYU's medical school

applicants are accepted, 90-95 per cent of the dental majors are accepted. Acceptance into medical school usually requires a 3.2 scholastic average, while dental schools require a 3.0.

OF ALL THE schools, the University of Utah, the University of California, USC for dentistry, with a variety of Utah the most medical school.

Assistants Needed For IBM Research

The BYU Computer Research Center will have openings in Student Assistants at the end of Spring Semester. Applicants must be good programmers with experience in programming for large computers of the order of 100,000 instructions.

GRADUATE STUDENTS are given preferential consideration. Appointments for interviews will be made in C-73 administration building.

'Skits-O-Frantic' Winners Disclosed

The results in the primary contest for Skits-O-Frantic have been announced with the winners listed as Senior Class, 44th Ward Rogers Hall, Sports, Intercollegiate Knights, and the Young Men.

These organizations will present their program in the Finals Program in the late February, according to Chairman Bill Hovner.
